(54) Title: TETRALIN COMPOUNDS WITH MDR ACTIVITY

(57) Abstract

The present invention relates to compounds that can maintain, increase, or restore sensitivity of cells to therapeutic or prophylactic agents. This invention also relates to pharmaceutical compositions comprising these compounds. The compounds and pharmaceutical compositions of this invention are particularly well suited for treatment of multi-drug resistant cells, for prevention of the development of multi-drug resistance, and for the use in multi-drug resistant cancer. These compounds are represented by general formula (I), in which the different substitutes are defined into the description.
