

ABSTRACT

WRIST-WATCH CASING ASSEMBLY

A wrist-watch casing assembly (11) which comprises a casing (12 & 13) for holding therein a watch module, said casing (12 & 13) having an upper part (13) and a lower part (12),
5 fastening means (14) for fastening the casing (12 & 13) onto a user's wrist, and elongate connecting means (17) adapted to connect the fastening means (14) to opposite sides of the casing (12 & 13). The connecting means (17)
10 is secured to the casing (12 & 13) by being sandwiched between the upper and lower casing parts (13 & 12).
