ABSTRACT OF THE DISCLOSURE

POLYMERIC FLUORESCENT SUBSTANCE AND POLYMER LIGHT-EMITTING
DEVICE USING THE SAME

A polymeric fluorescent substance showing fluorescence in the solid state, having a polystyrene reduced number-average molecular weight of 10^3 to 10^8 , and comprising one or more repeating units of formula (1) and one or more repeating units of formula (2) which is different from formula (1),

(1)

-Ar₁-

(2)

exhibits strong fluorescence and/or excellent charge transporting property, and a high performance polymer LED which can be driven at low voltage and high efficiency is obtained.
