(54) Title: CONSTRUCTIVE ARRANGEMENT FOR THE STARTING SYSTEM OF AN ELECTRIC MOTOR

(57) Abstract: A constructive arrangement for the starting system of an electric motor, comprising a basic body (10), to which are mounted a cover (20), a starting device (30) and a motor protector (40, 40'), said basic body (10) being provided, on an external face (11), with a projecting rod (12) for affixing the capacitor; a pair of first openings (13) for the fitting of respective terminals of a capacitor (2), to be coupled to the projecting rod (12); a first energizing opening (15) for electric connection to the starting device (30); and a second energizing opening (16), for electric connection to the protector motor (40), said basic body (10) defining a first housing (17) for receiving the starting device (30) and being closed by the cover (20) opposite to the projecting rod (12) and provided with two receiving openings (21) for receiving two pins for electric connection to the motor, the motor protector (40, 40') being provided with a female connector (41) for introduction of a third pin for electric connection of the motor, and which is mounted inside a second housing (17), the motor protector (40, 40') being electrically associated with a contact pin (42, 42') aligned with the second energizing opening (16).
