(54) Title: STERILIZATION WRAP AND PROCEDURES (57) Abstract A sterilization device comprising an inner sterilization wrap and a re-usable outer sterilization bag. The re-usable outer sterilization bag has an outside surface and an inside surface defining a pouch with an opening for receiving the inner sterilization wrap and a sterilizable object. The material is preferably a spunbonded or meltblown polyolefin fiber non-woven breathable web. Also provided are methods of sterilizing an object, and methods of using a sterilizable bag.
