

ABSTRACT

According to an embodiment, the recognition apparatus includes an image interface, an input interface, and a processor. The image interface is configured to acquire a display screen image from an input device for inputting a character string included in a captured image in which recognition of the character string according to a first algorithm fails. The input interface is configured to input the character string to the input device. The processor is configured to acquire a result of character recognition processing performed on the display screen image according to a second algorithm different from the first algorithm, and input the character string based on the result of the character recognition processing to the input device through the input interface.
