

SUPRAMOLECULAR AMINO ACID OR SALT THEREOF, AND PREPARATION
METHOD THEREFOR AND APPLICATION THEREOF

ABSTRACT

A preparation method for an N-long-chain acyl amino acid dipeptide, supramolecular amino acid and corresponding salts thereof, capable of controlling the occurrence of structural reconstruction and controlling the content of long-chain fatty acid. Further provided are a supramolecular amino acid and salts thereof, as well as an application in the fields of daily chemicals and the like.
