

WASHING MACHINE AND HEATED WATER GENERATION DEVICE

ABSTRACT

5

The present invention includes a housing, water tub (5) provided in the housing, a washing tub rotatably provided in water tub (5), a driving device that drives the washing tub to rotate, and heating device (19) that is provided in water tub (5) and heats a washing liquid. Heating device (19) is attached
10 to attachment portion (20) disposed in water tub (5), and attachment portion (20) is disposed with first side surface (20a) substantially orthogonal to rotation direction (A) of the washing tub during spin-drying to be inclined toward the rotation direction of the washing tub.
