(54) Title: EYE MASSAGING DEVICE

(57) Abstract: According to one aspect of the invention, there is provided an eye massaging device including: a visor; a light source connected to the visor and configured to illuminate the visor; an audio module connected to the visor, the audio unit adapted to produce a sound; a first massager connected to the visor, the first massager for massaging an eye area; and a control module electrically coupled to the light source, the audio unit and the first massager, wherein the control module is adapted to control the light source, the audio unit and the first massager.
