ABSTRACT

OPERATING MANAGEMENT SYSTEM, OPERATING MANAGEMENT METHOD, AND PROGRAM

There is provided an operating management system including: on-board units (100) that are each mounted on a plurality of vehicles (1a, 1b, …) and are configured to be capable of acquiring travel information which includes positional information of the vehicles (1a, 1b, …); and an operating management apparatus (600) that includes a travel-information acquisition unit which acquires the travel information from the on-board units (100) of the plurality of vehicles (1a, 1b, …) and an evaluation unit which evaluates driving of the vehicles (1a, 1b, …), based on relative operating states, for the plurality of vehicles (1a, 1b, …) specified based on the travel information.
