(54) Title: REMOTE IDENTITY INTERACTION

FIG. 2

(57) Abstract: One embodiment of the invention is directed to a method comprising: receiving, by a token requestor computer from a point of interaction device, verification of authentication data and the linking data; determining, by the token requestor computer, a token based on the linking data after analyzing the verification of the authentication data; transmitting, by the token requestor computer to a token service computer, a cryptogram request message; receiving, by the token requestor computer from the token service computer, a cryptogram associated with the token; generating, by the token requestor computer, an authorization request message comprising the token and the cryptogram to a processor computer; and receiving, by the token requestor computer, an authorization response message from the processor computer.
