(54) Title: METHODS AND APPARATUS FOR CREATION AND TRANSPORT OF MULTIMEDIA CONTENT FLOWS

(57) Abstract: The system executes a method for transporting a content flow to a wireless access network for broadcast to devices coupled to the wireless access network. The method exists on transmitting a request message to add the content flow to the wireless access network, wherein the request message includes a scheduled delivery time, receiving a response message indicating that the content flow will be added to the wireless access network, waiting until the scheduled delivery time, and delivering the content flow to the wireless access network. The system allows to broadcast multimedia over common networks at higher speeds without entailing costs as known from specialist network.
