(54) Title: TESTING ADAPTER

(57) Abstract: The invention relates to a testing adapter suitable for testing a wireless telecommunication device. The testing adapter comprises a first contact member (102A) and a second contact member (102B), the first contact member (102A) and the second contact member (102B) having at least one degree of freedom relative to each other and arranged to provide an attachable and detachable mechanical coupling with a surface of a component recess of the wireless telecommunication device on the basis of the at least one degree of freedom.
