(54) **Title:** VERIFICATION METHODS AND VERIFICATION DEVICES

FIG 1A

(57) **Abstract:** According to various embodiments, a verification method may be provided. The verification method may include: determining a plurality of objects, each object having a property; displaying a representation of each object of the plurality of objects; receiving from a user an input indicating a sequence of the plurality of objects; determining a sequence of the properties of the plurality of objects; and comparing the input with the sequence of the properties of the objects.
