

[ABSTRACT]

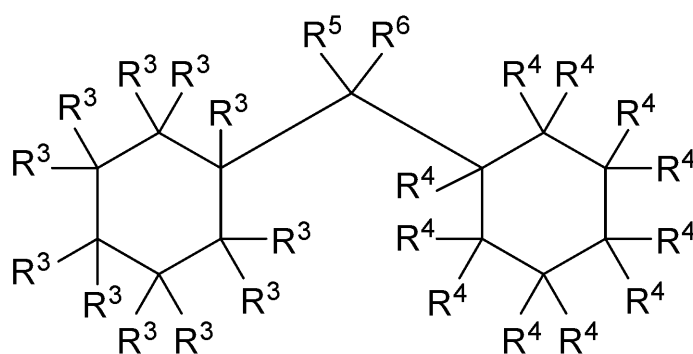

The present invention provides: a diepoxy compound whose cured product has a low water absorption rate; a curable composition obtained from the diepoxy compound; a
 5 cured product; and an optical member.

One aspect of the present invention relates to a diepoxy compound represented by the following formula 1 and a diepoxy compound represented by the following formula 2.

[Chemical Formula 1]

formula 1

formula 2

10

In the formulas 1 and 2, any one of R¹ groups is an epoxy group, and the remaining R¹ groups each independently represents a hydrogen atom or a linear or branched alkyl group having 1 to 10 carbon atoms. The same applies to R², R³ and R⁴.
