(54) Title: GENERIC ACCESS NETWORK (GAN) CONTROLLER SELECTION IN PLMN ENVIRONMENT

(57) Abstract: In one embodiment, a scheme is provided for selecting a generic access network (GAN) controller by a user equipment (UE) device disposed in a network environment including a GAN. Responsive to a query request by the UE device, one or more IP addresses of GANC nodes are obtained, each node for accessing a particular Public Land Mobile Network (PLMN). The UE device then authenticates with at least one GANC node for obtaining access service to a PLMN coupled thereto.
