DESCRIPTION

Title of Invention

CONVEYANCE SYSTEM

Technical Field

[0001] An aspect of the present invention relates to a conveyance system.

Background Art

[0002] A conveyance system including a plurality of vehicles and a controller configured to control the vehicles is known. As a technique of this kind, Patent Literature 1, for example, discloses that a controller communicates with a plurality of vehicles (traveling vehicles) sequentially and periodically.

Summary of Invention

Technical Problem

[0004] In the system described above, for example, as the number of vehicles increases, the cycle of periodic communication for communicating with the vehicles sequentially and periodically (what is called polling communication) becomes longer, and it may be difficult to communicate sufficiently with each vehicle.

[0005] It is an object of an aspect of the present invention to provide a conveyance system that can shorten the cycle of periodic
