(54) Title: METHODS AND SYSTEMS FOR SYNCHRONISED AND ATOMIC TRACKING

FIG. 5

(57) Abstract: A computer-implemented method for tracking, on a blockchain, at least two clients interacting with an asset, wherein the blockchain comprises a set of transactions associated with the asset, and a set of transactions associated with each client. The asset tracking comprising receiving an asset interaction event request comprising data indicative of at least two clients associated with an asset interaction event and data indicative of the asset, generating an event transaction comprising a reference to the set of transactions associated with the asset and references to the sets of transactions associated with the at least two clients, and submitting the event transaction to the blockchain.
