

ABSTRACT OF THE DISCLOSURE

PLURAL WIRELESSLY CONNECTED DEVICES WITH USER ALARM IF WIRELESS CONNECTION IS LOST OR ENDANGERED

A portable wireless user communication device is wirelessly coupled to a second device over a monitored link. If the link is lost or endangered, then a user alarm is activated at the portable wireless user device and/or at the second device to which it is linked (which may also be a portable electronic device). The type of monitoring and/or the type of alarming may be user selectable.
