(54) **Title:** METHOD FOR TESTING EMBEDDED WIRELESS TRANSCEIVER WITH MINIMAL INTERACTION BETWEEN WIRELESS TRANSCEIVER AND HOST PROCESSOR DURING TESTING

(57) **Abstract:** A method for testing a wireless transceiver embedded within a wireless data communication system that also include: a host processor with minimal interaction between the wireless transceiver and the host process or during such testing. The wireless signal interface between the wireless data communication system and external test equipment is used to convey test initiation or data signals from the external test equipment to the wireless data communication system, and responsive data or acknowledgement signals from the wireless data communication system to the external test equipment.
