(54) Title: CHANNEL LABELLING APARATUS FOR A TELEVISION RECEIVER

(57) Abstract

It is herein recognized that it is desirable that a television receiver provides preprogrammed labels for many widely-used television networks. The user has only to select the proper channel and then select a corresponding preprogrammed label from a list in order to associate the channel and label. In one embodiment the preprogrammed label is a graphically-formed logo or service mark of the television network.
