

Abstract

PRESERVATIVE SOLUTION FOR LIVE CELLS OR COMPOSITION
COMPRISING LIVE CELLS

5 To provide a preservative solution for live cells
or a composition containing live cells, a method for
preserving live cells or a composition containing live
cells by use of the preservative solution and the like,
the preservative solution being easy to prepare and
10 exhibiting a high cytoprotective effect, especially
during low-temperature storage. The aforesaid problem is
solved by providing a preservative solution for live
cells or a composition containing live cells, the
preservative solution containing vitamin C and/or vitamin
15 E or edaravone in a solution serving as a base of the
preservative solution, for example, a physiological
isotonic solution.
