

METHOD FOR COLORING DENTAL CERAMIC, AND COLORING
SOLUTION FOR DENTAL CERAMIC

ABSTRACT

5 A method for coloring a dental ceramic (10)
includes a step of contacting a coloring liquid (30)
with the dental ceramic (10). The coloring liquid
(30) contains at least two types of metal ions in
which a difference between standard oxidation-
10 reduction potentials is 0.5 or more and 4.0 or less.
