(54) Title: DATA COMMUNICATION OF FIXED SIZE DATA PACKAGES

Figure 4

(57) Abstract: According to an exemplary embodiment of the present invention, a data communication is provided, in which data is encoded into a data package of a fixed maximum size and transmitted to a receiving station. The receiving station decodes and further processes the data package on the basis of a decoding procedure in combination with processing information stored in the receiving station. The data belongs to a particular data group and a processing information relates to the particular data group.
