ABSTRACT

An object of the invention is to provide a 5-deazaflavin compound-containing emulsion and a method for producing the same. A 5-deazaflavin compound-containing emulsion of the invention as a means for solving the problem contains, as constituent components, at least (1) a 5-deazaflavin compound, (2) benzyl alcohol and/or phenoxyethanol, (3) a polysorbate and a lecithin, (4) a pharmaceutically acceptable salt of an aromatic carboxylic acid, (5) a fat or oil, and (6) an aqueous medium.
