

ABSTRACT

AUTHENTICATION AND/OR KEY MANAGEMENT METHOD, FIRST DEVICE, TERMINAL AND COMMUNICATION DEVICE

The present disclosure discloses an authentication and/or key management method, a first device, a terminal and a communication device. The method includes: receiving, by a first device, a session establishment request message initiated by a user equipment (UE), where the request message carries a key identifier; acquiring, by the first device, a first key between the first device and the UE according to the key identifier.
