(54) Title: METHOD AND SYSTEM FOR UPGRADING SOFTWARE

(54) 发明名称: 软件升级方法和系统

图 1 / FIG. 1

101 A client reports a software upgrade request to a server, wherein the upgrade request carries file information of the local software to be upgraded
102 The server determines the difference with the latest version software according to the file information of the software to be upgraded in the upgrade request, and generates upgrade instruction information according to the software difference and sends it to the client
103 The client downloads and upgrades the relevant file and performs the relevant local upgrade operation according to the instruction in the received upgrade instruction information

(57) Abstract: A method for upgrading software comprises: a client reports a software upgrade request to a server, wherein the upgrade request carries file information of the local software to be upgraded (101); the server determines the difference with the latest version software according to the file information of the software to be upgraded in the upgrade request, and generates upgrade instruction information according to the software difference and sends it to the client (102); the client downloads and upgrades the relevant file and performs the relevant local upgrade operation according to the instruction in the received upgrade instruction information (103). A system for upgrading software is disclosed as well. Application of the present solution can save bandwidth resources and reduce the workload for upgrading software.

(57) 摘要: 一种软件升级方法, 包括: 客户端向服务器上报告软件升级请求, 该升级请求中携带本地待升级软件的文件信息 (101); 服务器根据升级请求中的待升级软件的文件信息确定与最新版本软件的差异, 根据软件差异生成升级指令信息并下发给客户端 (102); 客户端根据收到的升级指令信息中的指令下载更新相应文件并执行相应的本地升级操作 (103)。也公开了一种软件升级系统。利用本方案, 可以节约带宽资源和降低软件升级的工作量。
