

ABSTRACT

FILE

To provide a file having favorable convenience.

The file includes a cover body (2) and a pocket body (3) attached to the cover body (2). The cover body (2) includes a front cover section (5), a spine section (6), and a back cover section (7). The front cover section (5) and the back cover section (7) are rotatable relative to each other about the spine section (6) via a hinge part (11) so as to face each other. The pocket body (3) includes a storage part (15) arranged to extend from the front cover section (5) to the back cover section (7) and allowing storage of an item (4) to be stored. A held part (22) is provided on an external side of the storage part (15) in a plan view. The front cover section (5) further includes a holding member (21) for holding the held part (22) movably. The pocket body (3) is bendable together with the cover body (2) while the stored item (4) is in the pocket body (3).
