
ABSTRACT

The embodiment of the present application discloses an image acquisition method, device, a server and a storage medium, wherein the method includes: acquiring the target application process corresponding to the user identity from the application process set; when detecting that the image rendering function in the target application process is called, calling the data interception module to intercept a plurality of window image data currently generated; performing image synthesis processing on the plurality of window image data to obtain a user interface image to be displayed; sending the notification message carrying the user interface image to the user terminal corresponding to the user identity, so that the user terminal displays the user interface image on the user interface.
