

ABSTRACT

HERMETIC COMPRESSOR AND STATOR INSULATOR

A hermetic compressor and a stator insulator for are disclosed. The hermetic compressor comprises an electromotive portion which drives a compressing portion. The electromotive portion and the compressing portion are housed within a container. The electromotive portion has a stator which supports the compressing portion. The stator comprises a stator core and a lower insulator. The stator is supported above the base of the container by a plurality of suspension springs. The lower insulator is provided with at least one snubber which engages with one of the suspension springs.
