

Abstract

ROCK INHIBITOR, AND PREPARATION METHOD THEREFOR AND USE THEREOF

- 5 A ROCK inhibitor represented by formula (I), and a preparation method therefor and a use thereof. The ROCK inhibitor has excellent ROCK inhibition activity, particularly shows good selective inhibition on ROCK2 kinase, has good safety and metabolic stability, and is high in bioavailability. The preparation method for the ROCK inhibitor is simple, and the ROCK inhibitor is easy to purify, and therefore has a good application prospect.
