(54) Title: COMPOSITIONS AND METHODS FOR TREATING HALITOSIS

(57) Abstract: The present invention relates to improved phosphopeptide stabilised amorphous calcium phosphate and/or amorphous calcium fluoride phosphate complexes and compositions containing those complexes. Methods of making the complexes of the invention and of treating or preventing oral conditions are also provided. In one aspect the present invention provides a method for treating or preventing halitosis in an individual in need thereof, the method comprising administering stabilized amorphous calcium phosphate (ACP) and/or stabilized amorphous calcium fluoride phosphate (ACFP) to the oral cavity of the individual, thereby treating or preventing halitosis. In another aspect, the present invention provides a zinc-associated stabilized amorphous calcium phosphate (ACP) and/or a zinc-associated stabilized amorphous calcium fluoride phosphate (ACFP) complex.
