(54) Title: COMPACT APPLIANCE FOR MAKING FLAT EDIBLES

FIGURE 1

(57) Abstract: A compact apparatus for automatically making a plurality of flat edibles includes a storage and dispensing unit that makes it unnecessary for a user to pre-measure ingredients. The apparatus also includes a mixing and kneading unit for making dough of optimal consistency. The mixing and kneading unit may be configured to prepare dough. The dough may be prepared by mixing and kneading the ingredients dispensed by the dispensers. The dough prepared may be transferred onto a lower platen from a transfer base by a transfer sweeper. The dough may be flattened in a platen unit. An upper platen and the lower platen of the platen unit may be heated to a pre-programmed temperature for cooking the flat edible. The temperature may also be manually set by the user based on user's preference. The flat may be cooked (e.g., heated, roasted and/or puffed) by the platen unit.
