

BAG BREAKING DEVICE AND BAG BREAKING PROCESSING METHOD

Abstract

5 A bag breaking device for tearing a waste accommodating bag body uses a drum-type washing machine which has: a water tank 2 for storing washing water; a bottomed cylindrical rotary tub 3 which is rotatably supported inside the water tank 2 such that the rotation axis thereof is substantially horizontal and which accommodates laundry; and a motor 5 which rotates the rotary tub 3, in which a blade 12 for bag breaking is provided on the inner circumferential surface
10 of the rotary tub 3. A method for processing a waste accommodating bag body uses the bag breaking device.
