

CURTAIN WALL CLADDING SYSTEMABSTRACT

5           A panel for a curtain wall panelling system  
comprises two pans 22,24 having inturned marginal flanges.  
The marginal flange 52 of the first pan 22 has a laterally  
projecting edge portion 58. This is engaged against  
abutment 60 of intermediate rigidifying profiles 28,30  
0 positioned between two adjacent panels. The abutments 60  
retain the pan 22 against movement, the profiles 28,30 being  
secured by a fastener 18 against the support structure 10.
