(54) Title: METHODS AND SYSTEMS TO ENHANCE FOAM GENERATION AND QUALITY THROUGH DISPENSER

(57) Abstract: Methods for generating an improved quality foam for a beverage are presented. In an embodiment, the method comprises providing at least one protein source; providing at least one multivalent ion source; providing a liquid source separate from the multivalent ion source; simultaneously dispensing the protein source and the multivalent ion source with the liquid source; and aerating during the dispensing to produce the stable foam. The foam has an improved stability, texture and mouthfeel.
