

ABSTRACT

GRIPPING TOOL

An object of the present invention is to provide a gripping tool that efficiently and reliably enables a close contact between a container and a lid with a simple mechanism and a simple operation. The present invention relates to a gripping tool mounted on a container and a lid for the container to grip the container and the lid. The gripping tool includes a base on which the container is placed, and a cover configured to cover the lid. The base and the cover each have an opening at a central portion and are configured to engage with each other to press and grip the container and the lid upward and downward.
