
Starting an investigation application program preinstalled on a mobile terminal, receiving an investigation request in a display interface of the investigation application program, and determining whether a corresponding initiator of the investigation request is a predetermined investigating role
S10
Receiving an assignment instruction to assign the investigation task when the corresponding initiator of the investigation request is the predetermined investigating role and a corresponding investigation task of the investigation request is a predetermined task
S20
Performing a corresponding transfer or assignment of the investigation task after determining the investigation task needs to be transferred or assigned, when the corresponding initiator of the investigation request is the predetermined investigating role and the corresponding investigation task of the investigation request is not the predetermined task
S30

FIG. 1

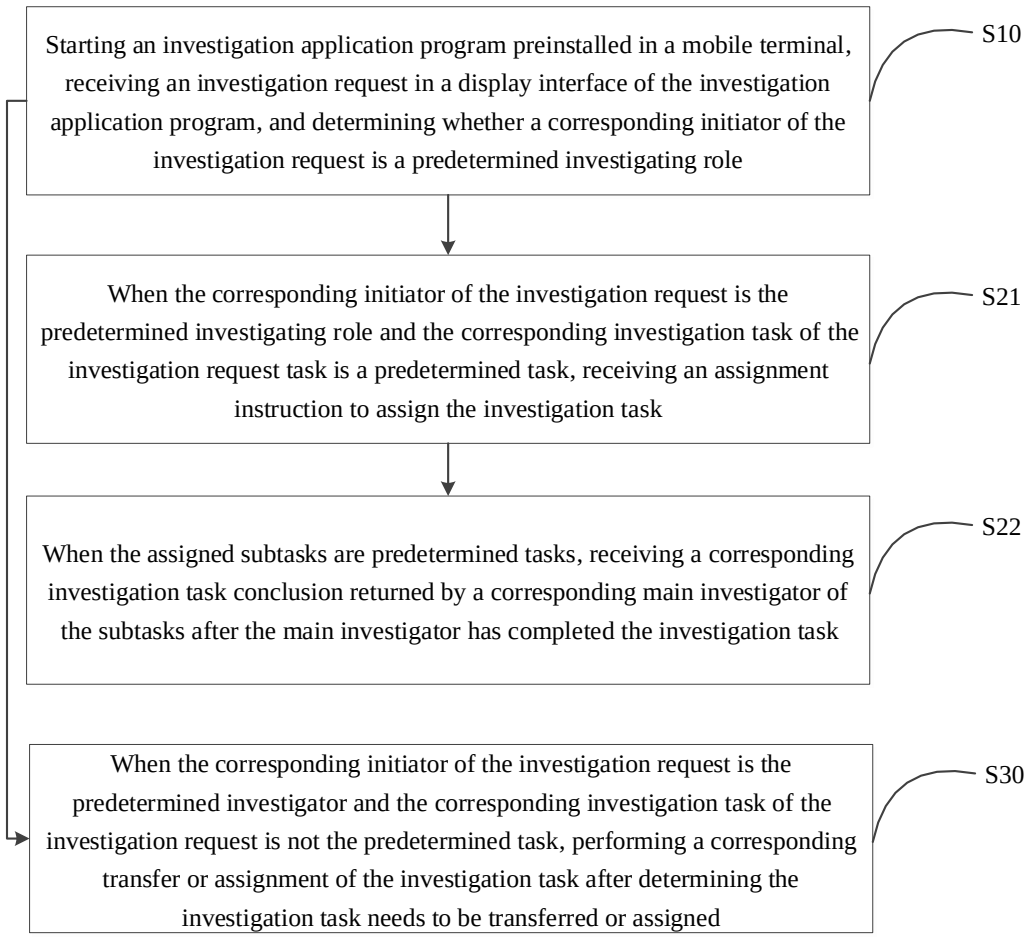

Starting an investigation application program preinstalled in a mobile terminal, receiving an investigation request in a display interface of the investigation application program, and determining whether a corresponding initiator of the investigation request is a predetermined investigating role
S10
When the corresponding initiator of the investigation request is the predetermined investigating role and the corresponding investigation task of the investigation request task is a predetermined task, receiving an assignment instruction to assign the investigation task
S21
When the assigned subtasks are predetermined tasks, receiving a corresponding investigation task conclusion returned by a corresponding main investigator of the subtasks after the main investigator has completed the investigation task
S22
When the corresponding initiator of the investigation request is the predetermined investigator and the corresponding investigation task of the investigation request is not the predetermined task, performing a corresponding transfer or assignment of the investigation task after determining the investigation task needs to be transferred or assigned
