(54) Title: A BINDING METHOD

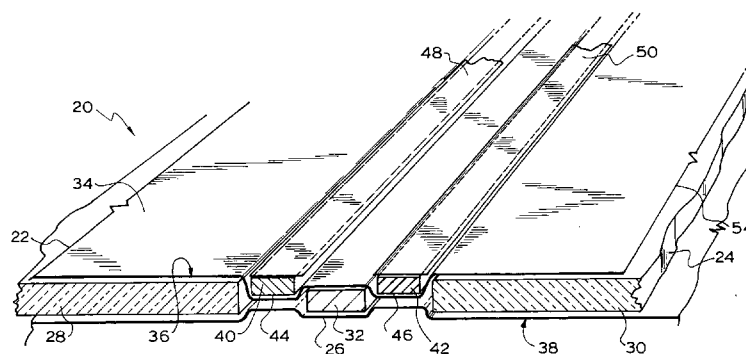

Fig. 2.

(57) Abstract: The present invention relates to a binding method for forming a book. The method includes the steps of: providing a cover (20) having front and back panels (22 and 24) which are joined by a spine panel (26); providing a book block (10) having front and back fly sheets (14 and 16); applying a first adhesive member (40) on a first part of the spine panel (26); applying a second adhesive member (42) on a second part of the spine panel (26); contacting the front fly sheet (14) with the front panel (22) in such a way that a margin of the front fly sheet (14) overlaps the first adhesive member (40); contacting the back fly sheet (16) with the back panel (24) in such a way that a margin of the back fly sheet (16) overlaps the second adhesive member (42); and pressing on the first and second parts of the spine panel (26) to bond the margin of the front fly sheet (22) to the front panel (22) and the margin of the back fly sheet (16) to the back panel (24), respectively.
