

ABSTRACT

**METHODS AND SYSTEMS FOR GENERATING IMAGE DATA FOR AN
INTERACTIVE DISPLAY**

5

Methods and systems for generating modified image data of a user for an interactive display are disclosed. An imaging device is used to image the user to obtain user image data. A user attribute for the user is detected, and based on the detected user attribute, stock image data is selected for association with the

10 obtained user image data. The selected stock image data may be combined with the obtained user image data, for display to the user.
