(54) Title: AERODYNAMIC FAIRINGS FOR TRAILER

FIG. 1

(57) Abstract: One embodiment includes a system and method for aerodynamic fairings including a gap fairing. The gap fairing may include a multiple panels. The multiple panels may interconnected utilizing connectors to form an aerodynamic shape extending from a front portion of a trailer. The gap fairing also includes supports connected to the plurality of panels through support structure of the trailer. Another embodiment provides a pneumatic container trailer with a gap fairing. The pneumatic container trailer may include a support structure. The pneumatic container trailer may also include multiple panels interconnected to form a substantially half conical shape.
