(54) Title: CONTAINER FOR FOOD AND/OR DRINK TO BE CONSUMED ON THE MOVE AND METHOD FOR MAKING IT

FIG. 9

(57) Abstract: A container for food and/or drink to be consumed on the move comprises a first portion (24) forming at least a first holder (3) for containing at least one food to be consumed on the move or for a first receptacle containing a food or a drink to be consumed on the move, and at least a second portion (25) connected to the first portion (24) and forming at least a second holder (4) for supporting a second receptacle containing at least one food or a drink to be consumed on the move. The first holder (3) and the second holder (4) are vertically aligned and they are distanced from each other in such a way as to allow the user independent access both to the first holder (3) and to the second holder (4). For that purpose, at least a third, connecting portion (28) is fixed to the first portion (24) and to the second portion (25) and forms at least one opening (29) for access from above to the lower holder. A method for making a container of this type is also claimed.
