

ABSTRACT

The present application provides a live streaming auditing method and apparatus, a server, and a storage medium. The live streaming auditing method comprises: performing, by means of a high-accuracy auditing model and a high-recall auditing model which are cascaded, preliminary violation auditing on the current live streaming frame in a to-be-audited live streaming room; and if the current live streaming frame passes the preliminary violation auditing, inputting, into a pre-constructed behavior auditing model, a first violation score of the current live streaming frame under the high-accuracy auditing model, a second violation score of the current live streaming frame under the high-recall auditing model, and a multi-dimensional behavior feature of the current live streaming frame in said live streaming room, to obtain a target violation score of the current live streaming frame.
