

ABSTRACT

GATE OF PARKING LOT AND PARKING SPACE WITH DISPLAY FUNCTION

A gate of parking lot applied to a parking lot is provided. The gate of parking lot includes a door frame, a mist curtain generating device and a projection device. The door frame is disposed in a lane of the parking lot. The mist curtain generating device is disposed in the door frame and configured to form a mist curtain between the door frame and the lane. The projection device is configured to provide an image beam to the mist curtain to form an image picture on the mist curtain. A parking space with display function is also provided.
