

ABSTRACT:**WRITING TOOL AND DISPENSING UNIT THEREOF**

A writing tool includes a writing unit (10), a capillary member (20), a dispensing unit (30), and a replaceable ink cartridge (40). The capillary member (20), the dispensing unit (30), and the replaceable ink cartridge (40) are mounted in the writing unit (10). The dispensing unit (30) contacts the capillary member (20) and has at least one cutting portion (321). The replaceable ink cartridge (40) accommodates ink therein and has a film (42) at one end thereof. The replaceable ink cartridge (40) is installed in the dispensing unit (30) and the film (42) is pierced and cut by the cutting portion (321). The ink flows through the film (42) and is delivered to the writing unit (10) via the capillary member (20) and the dispensing unit (30) for writing. The writing tool (10) dispenses the ink fluently and leaves no residual ink.
