(54) Title: METHOD OF MANAGING RESOURCES

162162

(57) Abstract: The invention is concerned with a method of retrieving information in respect of subject matter of interest to a user on the basis of a state of the user, and of presenting the retrieved information to the user via a terminal, where the presentation of information includes creating a viewable page that comprises at least some of the retrieved information. The method includes the steps of: (i) retrieving information, (ii) organising the retrieved information in accordance with predetermined criteria, at least one of which includes a state of the user, and (iii) storing the organised information, such that when a viewable page is created, a selection of said stored information is retrieved in accordance with display capabilities of the terminal.
