(54) Title: A METHOD AND SYSTEM FOR SCREENING A USER'S TEMPERATURE

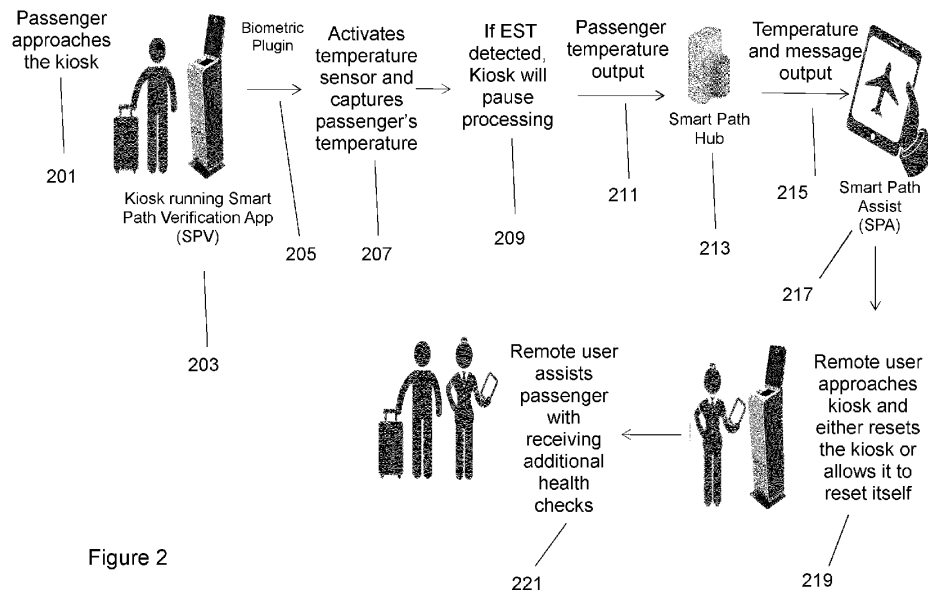

Figure 2

(57) Abstract: A method for screening a user temperature, the method comprising: detecting a user's face in a first image (100) using a first camera operating within a first portion of the electromagnetic spectrum; aligning the detected user's face to a second image (110) of the user's face detected using a second camera operating within a second portion of the electromagnetic spectrum which is different from the visible spectrum; determining (207, 307) the user's temperature based on the second image (110) aligned to the first image (100); and determining (209, 309) if the user's temperature exceeds a predetermined threshold.
