

FAILURE INFORMATION DELIVERY SYSTEM, FAILURE
MANAGEMENT SERVER, MOBILE OBJECT COMMUNICATION
APPARATUS,
FAILURE INFORMATION DELIVERY METHOD, AND PROGRAM

ABSTRACT OF THE DISCLOSURE

Upon detecting existence of characteristic information of a failure,
of which search is requested, a mobile terminal device 102 notifies a
failure management server 104 of the detected location information and
5 time information together with the characteristic information of the
failure, and the failure management server 104 notifies a terminal device
1022 of the location information of the failure to be estimated on the
basis of the detected location information, time information, and the
characteristic information of articles and allows the terminal device 1022
10 to output this location information. Thereby, even in the case that no
communication apparatus is provided to a target apparatus, a failure can
be detected and a probability of notification can be improved.
