(54) Title: HYPOIMMUNOGENIC RHD NEGATIVE PRIMARY T CELLS

(57) Abstract: Disclosed herein are hypoimmunogenic T cells having reduced expression of RhD antigen for administering to a patient. In some embodiments, the cells are propagated from a primary T cell or a progeny thereof or are derived from an induced pluripotent stem cell (iPSC). In some embodiments, the cells exogenously express CD47 proteins and exhibit reduced expression of MHC class I proteins, MHC class II proteins, or both. In some embodiments, the cells exogenously express one or more chimeric antigen receptors.
