(54) Title: STAND FOR CASING

(57) Abstract: It is intended to obtain a stand for a casing, in which the structure is simple, the assembling operation is easy, and it is possible to stably support the casing. The stand (10) comprises a pair of stand members (30a, 30b). Each of the stand members (30a, 30b) is integrally formed with a casing support section (32) and a connecting section (34). Projections (44, 46) are provided on the connecting section (34). The projections (44, 46) are used to connect the stand members (30a, 30b) to one another, and they are used to attach the stand members (30a, 30b) to the casing.
